

J WAYNE GRAVES JR

Operation Leader, Automation Expert and Quality Improvement Specialist

jwaynegravesjr@gmail.com

I turn recurring quality problems into clearer ways of working. I investigate errors, develop practical guidance with operational specialists, and support implementation through demonstrations, coaching and follow-up.

Direct management: 20 operations-team members. Quality lead scope: an 80-person line of business.

PROFESSIONAL EXPERIENCE

WIPRO LIMITED 2022-Present

Operations & Quality Responsibilities

- Directly managed a 20-person operations team while serving as quality lead for an 80-person line of business.
- Investigated recurring genetics handling errors through error classification and root-cause narratives. Drafted questions, then refined and expanded them with the Nurse Supervisor whose team reported the errors.
- Authored the operational questions, answers, corrective callouts, email templates and decision logic in pseudocode. AI converted that pseudocode into the local HTML/CSS Genetics Support Tool.
- Rolled out the tool to all teams at the beginning of July, demonstrated it to genetics teams and provided team leads with written guidance. Team leads confirmed continued use; leaders described using it to coach agents.

ASHLEY FURNITURE INDUSTRIES 2021-2022

Customer Service Representative

Supported customers with website navigation and online ordering; resolved usability issues and helped streamline call-center workflows.

CONVERGYS 2015-2016

Technical Support Representative

Delivered remote hardware and software troubleshooting for Dell ProSupport customers and shared troubleshooting and service practices with colleagues.

SELECTED PORTFOLIO PROJECT

Genetics Support Tool

Designed an operational guidance tool for agents processing genetics prior-authorization requests. Used recurring error patterns to develop a question-led workflow, refined with the Nurse Supervisor. Authored the guidance and decision logic; AI produced the local HTML/CSS implementation. Supported rollout through demonstrations and written instructions, with team leads confirming continued use.

EDUCATION & TRAINING

Hillsborough Community College | Associate of Arts | 2013-2015
